DINO-MITE School Meals Have Arrived

Contrary to popular belief, schools meals are not extinct. Canyons School District has transformed their school meal programs into DINO-MITE programs. The mystery of the prehistoric times come alive in our new colorful nutrition marketing promotion. Our marketing promotion is focused on creating roaring meals that are designs to help your kids learn lifelong healthy eating patterns. Our school meal programs are far from prehistoric but instead are updated regularly with the best interests of the students in mind. We want your little dinos to experience a prehistoric adventure by participating in our school meal programs all while receiving the nutrients they need. So the next time you send your little dino out the door, know that adventure awaits them with DINO-MITE school meals.
